### Crescent-shaped Boat

There is a crescent moon in the sky.

A crescent moon in the river.

When the wind blows, the crescent moon in the river is like a little boat, rocking gently on the water, and the stars are like waves.

Little fish, come row, crescent-shaped boat, it's so fun.

Additional note:

The poem is about the reflection of the crescent moon on the river surface. The reflection looks like a crescent-shaped boat floating on the river.
